

June 22, 2018

Fraser Health Physician Quality Improvement (PQI) would like to announce the graduation of the third cohort of 21 physicians, 2 medical staff and 1 patient partner, on June 7, 2018 at the Civic Hotel in Surrey. With almost 100 attendees, this was the time to recognize the efforts of graduates and celebrate their achievements to date. It was also the opportunity to connect with peers and senior leadership at Fraser Health. Following a lively poster reception which allowed for cohort members to showcase their projects, the rest of the evening was spent hearing cohort members share their experience and learnings from PQI.

After three years of PQI training and one more commencing this month, it is exciting to witness more physicians and medical staff becoming QI leaders within the community. We would like to thank everyone who has been involved in the success of PQI so far, and we look forward to continuing our work.

Sincerely,
Dr. Dave Williams, MBBS, FRCPC, FACP, MBA
Executive Medical Director Quality & Safety
