

Flu Season – Please Get Vaccinated

The Fraser Health Medical Advisory Committee supports the Influenza Prevention Program Policy as an important infection control and patient safety measure. The policy requires all individuals who work in patient care areas to receive a flu shot or wear a mask during flu season.

Our Request:

- Please get a flu shot before **December 1, 2016**
- Please report your vaccination to us at <https://medicalstaffhealth.phsa.ca>

If you have not reported your vaccination by Dec. 1, Fraser Health will assume you have declined vaccination and will wear a mask in patient care areas for the duration of the influenza season.

Flu shots are available the week of October 17

Options to get a FREE flu shot:

- Community physician and pharmacy providers - week of October 17
- Fraser Health workplace flu clinics – October 31 (see attached site schedule)
- Peer Nurse Immunizers in some units - October 31

Influenza Prevention Program Policy
