B. Accessing Patients List

- A) My Admitted** – displays only patients associated through admissions where the provider is the primary care, admitting, attending, primary care, family, referring, or other physician.
- B) Rounds Patients** – displays patients associated to the physician user during an active inpatient visit, patients associated to another physician/group that the user has selected for coverage, and patients manually added to the list. This is your default patient list.
- C) Outpatients** - displays a list of patients scheduled for an outpatient procedure for a specific date.
- D) Emergency Patients** – Provides a list of associated patients in the ED.

Patient lists are arranged per FHA facility in alphabetical order and include: **Unit, Patient Name, Room #, Age, Sex, Most Responsible Physician, and Consulting Provider.**

C. Finding Patients

1. Select **Find Patient**.
2. Type in patient's last name and, first name or their account number.
3. Select **Search** to view a list of patients.
4. Click on **'Patients name'** to access patient information.

D. Finding Patients by Location

1. Select **Find by Location**.
2. Click on the dropdown arrows on **Facility** and 'Location' fields and select accordingly.
3. Click on **Patients name** to access patient information.

E. Adding Patients to Rounds List

1. After you have found your patient, either by name/account or by location, click on Add Selected

F. How to Change your Rounds List

1. Select **Coverage** button.
2. Click **Lookup Providers** and type in the covering provider's last name, first name and select accordingly
3. Or by the dropdown arrows from the **Favorites, Groups, Facility or Location** options.

G. Removing Patients from Rounds List

1. Select **Coverage** button.
2. Click on the check mark in the green box in front of the covering provider that you no longer need to cover for.
3. Select **Submit** on the bottom of screen.

H. Self-Assign / Signup Functionality

1. Must follow the latest MRP policy.
2. From any patient list, select patients by clicking on the green checkmark and other checkmarks in box(es) by the patients name(s) will display.
3. Select **Sign Up**.

H. Self-Assign / Signup Functionality

1. Must follow the latest MRP policy.
2. From any patient list, select patients by clicking on the green checkmark and other checkmarks in box(es) by the patients name(s) will display.
3. Select **Sign Up**.

H. Self-Assign / Signup Functionality

4. Select provider type that needs changing by placing a green checkmark in front of patient name.

5. Select correct action (**Replace, Sign Up, Remove or Cancel**).

6. If replacing, select desired provider from Recent, Group, or All button options or by typing providers name in Search field.
7. Click on the correct provider name.
8. You will need to log out of MMR and log back into MMR to see the changes.

I. Restore Accounts

1. This will remove all edits and additions made to your assigned list of patients for that session.
2. Click on **Restore Accounts**.
3. Click on **Restore list**.
4. Note that this function is irreversible.
