

Regional Medical Director, Research Fraser Health

Fraser Health, Canada's largest and fastest growing Health Authority seeks an exceptional and dedicated candidate with research leadership experience to join our team.

This position reports to the Vice President of Medicine.

The Regional Medical Director Research will be responsible for:

- Setting the Medical Research agenda for Fraser Health:
 - in collaboration with senior leadership at FHA, Faculty of Medicine, University of British Columbia (UBC) and Faculty of Health Sciences, Simon Fraser University (SFU) and
 - in partnership with FHA's Director, Department of Evaluation and Research Services.
- Integrating and supporting medical research and development within Fraser Health, by partnering with UBC, SFU other universities, health authorities and research agencies.
- Implementing the integrated research vision by working with FHA medical staff and government liaisons, research foundations and institutions, the community and private sector.

As the successful candidate you have:

- At least 5 years of research leadership experience in progressive, complex health care organizations, senior leadership in research focused institutions or equivalent.
- Demonstrated strong administrative, interpersonal and leadership skills
- Track record of significant research achievement
- Academic appointment to UBC Faculty of Medicine

Compensated under contract for a 3 year term
