

## Cataract Surgery Intraocular Lens SPECIALTY LENS / PATIENT PAY CONSENT

**SURGEON:** \_\_\_\_\_

**PATIENT NAME:** \_\_\_\_\_

*All cataract surgery involves removal of the clouded lens, and implantation of a replacement lens. In BC, the basic insured implant for cataract surgery is the foldable monofocal intraocular lens. Specialty lenses (those intended to avoid use of spectacles) are not insured and are provided on a patient-pay basis only.*

### PLEASE READ CAREFULLY

I understand that there is an insured monofocal foldable lens provided by the Health Authority at no cost to me. This lens is what is medically required to correct my cataract.

I request, as a matter of my own preference, provision of the specialty lens described below, which is not medically required, and not insured. I understand that specialty lenses (which are intended to correct vision beyond replacement of the clouded lens) are not benefits under the *Hospital Insurance Act*, as this service is not medically required.

I acknowledge that the physician has clearly communicated to me the risks and benefits of the non-insured lens relative to the insured lens.

I understand this lens will be provided by the health authority (not the surgeon), and that payment is due to the health authority. The cost to me is the difference in cost between the item I have chosen, and the insured lens. I accept responsibility for payment to the health authority of the cost stated below.

I understand that if, during the course of surgery, the surgeon has to use a different lens (other than the lens I paid for) then I will pay, or receive a reimbursement for, the difference in cost.
